#### Employment Rate Methodology

Hussian College, Inc. calculates an Employment Rate for each program using a formula specified by its institutional accreditor, the Accrediting Commission for Career Schools and Colleges (ACCSC). The employment rate formula uses a cohort of students who began school during a 12-month reporting period specified by ACCSC, as the denominator. The reporting period is dependent upon the length of the program. Graduates are considered “unavailable for employment” and excluded from the cohort for the following reasons: further education at an accredited institution of higher education (postsecondary) on at least a half-time basis, death, incarceration, active military service deployment, the onset of a medical condition that prevents employment, or international students who have returned to their country of origin. The numerator is comprised of graduates in the cohort who obtained employment in their field of training, or a related field, which was verified by the school. The rate is calculated for the cohort based on program length in months and allow for student to complete the program within 1.5 times of the program length plus 3 months to obtain employment.
